

THE NEW REVOLUTION IN CABLE MANAGEMENT!

⚡ ABOUT CHARGEBOOM

As car enthusiast we notice some shortcomings when we took the leap into a fully electrified life. The first thing we noticed was the apparent safety concern when running charging cables on the ground. Clearly there had to be a better way. Frustrated with the lack of cable management solutions offered in the market we decided to come up with our own. Thus, was born ChargeBoom. Our approach is simple; an out of the box solution with ridiculously good build quality to last a lifetime*. ChargeBoom can be used in commercial and residential application thanks to its many accessories and mounting options.

ChargeBoom is the safe solution for EV charging.

⚡ THE BENEFITS

- Reduced tripping hazard
- Avoids accidental damage to cables and EVSE's
- Hassle free and clean operation of charger cables
- Prolongs equipment lifecycle
- Zero down time
- Multiple installation types for different applications
